Education

University of Mississippi — Oxford, MS

Bachelor of Science in Computer Science, Minor in Mathematics — *Aug. 2024 – May 2028*

- GPA: 3.87/4.0 – Chancellor's Roll (all semesters) – Sally McDonnell Barksdale Honors College (Top 5%)
- Coursework: Data Structures & Algorithms, Object-Oriented Programming, Databases, Operating Systems

Experience

Software Engineering Intern — June 2026 – Aug. 2026

C Spire – Billing Team (Received Return Offer) — *Ridgeland, MS*

- **DAR Ticket Automation:** Saved 30 min/day and replaced 10–20 daily manual reviews by gathering needs from operations staff and shipping a Python/KornShell monitoring pipeline that files ServiceNow tickets
- **On-Call Dashboard:** Let 12 teammates and 2 managers reassign on-call shifts on any date by building a Django calendar dashboard end to end that replaced verbal swaps in daily scrum (still in use)
- **Bank Lockbox Zero-Payment Auto-Ignore:** Auto-cleared 100+ harmless $0 payment rejections weekly by fixing payment logic to still halt on real errors, eliminating a manual operator step
- **International Day Pass Audit:** Caught mismatched billing plans before customers saw them by building a Python/KornShell audit against Oracle SQL, run as one CI/CD-ready command

Undergraduate Research Assistant – Distributed AI Systems — Jan. 2026 – Present

University of Mississippi (Prof. Feng Wang) and University of Memphis collaboration — *Oxford, MS*

- Verified all 300 outputs of a distributed YOLO object detection pipeline across an Apple M3 Mac and 2 Linux VMs within a max error of 0.000137 by debugging dependency, authentication, and ordering errors

Undergraduate Research Assistant – Robotics — Oct. 2024 – Apr. 2025

University of Mississippi – Thad Cochran Research Center — *Oxford, MS*

- Reduced contamination risk by 85% in pharmaceutical research by programming robotic arm workflows in Python/C++ and building pandas/NumPy pipelines to collect and analyze experimental data

Projects

ValueStop, Co-Founder | *React, Gemini 2.0 API, Google Maps API, Firestore* — Nov. 2025 – Present

- Grew an LLM-powered shopping app to 100 active users and 20 paying customers by evolving a 36-hour EmoryHacks 2025 prototype, built with a 3-person team, into a live product
- Built a user-facing route recommendation feature by integrating the Gemini and Google Maps APIs (JSON) with A* pathfinding to plan shopping trips across stores

WhoSponsors | *Python, SQLite, Next.js, ETL, Entity Resolution*

- Unified 831k USCIS filings into a searchable database of 324k employers by building an ETL pipeline with entity resolution to reconcile inconsistent company names, with per-company trend charts

NeuraBash | *Python, Bash, OpenAI GPT-4, Ollama, Prompt Engineering* — Sept. 2025 – Oct. 2025

- Reduced RAM footprint by 30% via a memory-efficient design for a GPT-4/Ollama terminal AI coding assistant

Leadership

Tech Lead, AWS Student Builder Club — 2026 – Present

University of Mississippi Chapter — *Oxford, MS*

- Set the project roadmap for a 15+ member chapter and led all 4 hands-on AWS build sessions, explaining cloud concepts in plain language for members at varied skill levels

Technical Skills

Languages: Python, TypeScript, JavaScript, SQL, Java, C++, KornShell, Bash
Web & Data: React, Next.js, Django, REST APIs, JSON, Oracle SQL, SQLite, MongoDB, Firestore (NoSQL)
AI/ML: LLM APIs (GPT-4, Gemini), Ollama, Prompt Engineering, ONNX Runtime, YOLO, Claude Code, Cursor
Cloud & DevOps: AWS, Docker, Kubernetes, CI/CD, Git, GitLab, Linux, Unit Testing (pytest), Jira, ServiceNow
